WORKSHOP FACT SHEET

How To Teach Math To English Learners

by Zandra de Araujo

$49.00

(**$58.80** for 12 months access)

View Workshop

Subject: Mathematics

Start Date: Immediate access

Access: 4 months

Timing: Self-paced with no set meeting time

PD Hours: 2 Professional Development Hours

Credits: 1 Graduate Level PD Credit Available

Topics Covered:

- English Learners
- Language and Mathematics
- Communicating Math
- Understanding Math

One tree will be planted per registration (partnership with One Tree Planted).

About This Workshop

We'll begin by examining how it is a math teacher's job to teach language skills. Then we'll move on to learning about some things you'll wish you had known about teaching English learners. From there we will move on to specific strategies that will allow you to help students understand what they read and hear in your math classroom. We'll then move on to strategies to help students share their thinking, in writing and speaking. Finally, we'll end by putting all the strategies together in your classroom, whether it be online or face-to-face.

About the Instructor

Zandra de Araujo

Zandra de Araujo started her career as a high school mathematics teacher. Currently, she is a mathematics teacher educator and researcher at the University of Missouri. Her work focuses on understanding practical strategies to make mathematics more meaningful (for teachers and students!). She is the author of numerous mathematics education publications, the creator of the *Mathematically Educated* blog, and the co-creator of the *Two-Minute Teacher's Guide*.
