WORKSHOP FACT SHEET

How To Use Math Flips To Build Fluency

by Berkeley Everett

$49.00

(**$58.80** for 12 months access)

View Workshop

Subject: Mathematics

Start Date: Immediate access

Access: 4 months

Timing: Self-paced with no set meeting time

PD Hours: 2 Professional Development Hours

Credits: 1 Graduate Level PD Credit Available

Topics Covered:

- Fluency
- Math Flips
- Addition
- Multiplication
- Number Sense

One tree will be planted per registration (partnership with One Tree Planted).

About This Workshop

If you've heard of Math Flips and maybe even tried them yourself, but are not satisfied with how things have gone and want consistently good results, then my mini workshop is for you. I'll help you feel comfortable implementing Math Flips so that your students love them and are building strong number sense and fluency.

First we'll explore how Math Flips can help your students. We'll then talk about how to prepare to use Math Flips both in person and remotely. From there we'll discuss how to introduce Math Flips to your students and how to facilitate meaningful conversations. Finally, we'll go over how to support students' families with Math Flips and how to integrate them with your current teaching resources.

About the Instructor

Berkeley Everett

Berkeley Everett is an elementary mathematics consultant and creator of Math Flips. His digital resources (found at berkeleyeverett.com) are used across the world and he speaks internationally on topics including number sense, fluency, and sense-making.
